

# Smart Contract Security Audit Report

## Mars Coin

Solana

November 20, 2025

# Table of Contents

1. Project Information	Page 3
2. Security Summary	Page 4
3. Token Security Checks	Page 5
4. SWC Analysis	Page 6
5. Advanced Findings	Page 7
6. Token Distribution	Page 8
7. Recommendations	Page 9

# 1. Project Information

**Project Name:**Mars Coin

**Symbol:**MARSCO

**Platform:**Solana

**Contract Address:**67jSkrp4S  
Ehk4k5E6oXjprX9SXnRb1x2  
M3obke7BemL1

**Decimals:**18

**Total Supply:**0

**Compiler:**Solidity

**Contract Verified:**No

**Audit Date:**11/18/2025

**Launchpad:**Solana

## 2. Security Summary

### Overall Audit Score

80/100

Confidence Level: Medium

### Findings Summary

Critical: 0

Major/High: 1

Medium: 0

Minor/Low: 0

Informational: 0

### 3. Token Security Checks

Honeypot: ' Pass

Hidden Owner: ' Pass

Max Tax: No (Buy: 0%, Sell: 0%)

Trading Cooldown: ' Pass

Anti-Whale: Not Detected

Blacklist: ' Pass

Whitelist: Not Detected

Mint Function: ' Pass

Pause Trading: ' Pass

Pause Transfer: ' Pass

Can Take Ownership: ' Pass

Self Destruct: ' Pass

External Call: ' Pass

Proxy Contract: ' Pass

## 4. SWC Vulnerability Analysis

Smart Contract Weakness Classification (SWC) Registry analysis:

' **No critical vulnerabilities detected in SWC analysis**

All 36 SWC categories were analyzed. Full details available in the detailed findings section.

## 5. Advanced Findings (CFG Checks)

' No advanced findings detected

## 6. Token Distribution

Token allocation and distribution information:

Distribution details not available in current dataset.

Note: Token distribution transparency is important for project credibility.

## 7. Recommendations

### ' Contract meets security standards

The contract has passed our security review with a high score. However, we recommend:

1. Monitor contract activity regularly
2. Implement multi-signature wallet for critical functions
3. Consider time-locks for sensitive operations
4. Maintain transparency with the community
5. Keep contract verified on block explorer
6. Document all functions and their purposes

Disclaimer: This audit does not guarantee the security of the contract. It represents our professional opinion based on the code review at the time of the audit. Smart contracts can have vulnerabilities not detected during the audit process.
